Рассеиватели, заглушки, ленты светодиодные, источники питания заказываются отдельно

с рассеивателем
HW.005.098.3000.FR

с рассеивателем
HW.005.096.FR

Описание

В новой версии внесены небольшие изменения в конструкцию профиля: внешние торцы (ушки) профиля стали тоньше, так что профиль теперь устанавливается практически заподлицо с поверхностью.

Изменился принцип монтажа рассеивателя в профиль: теперь он устанавливается в пазы в профиле (тип Slide).

Профиль 2210 используется с LED-лентами шириной всего 5 мм.

Данный вид профиля применяется для подсветки мебели, торгового и рекламного оборудования. Благодаря установке ленты под наклоном световой поток направляется во внутреннее пространство мебели и не слепит глаза. Тонкая полоса рассеянного, без эффекта видимых точек, света подчёркивает утончённость и лёгкость мебели. Лёгкий и прочный профиль изготовлен из алюминия и представлен в отделке белая (покраска). Длина профиля – 3100 мм.

К профилю предлагаем различные аксессуары: матовый рассеиватель из поликарбоната, торцевые заглушки, клипсы для скрытого монтажа и т.д.

Характеристики

Ширина (В, мм)	19.5
Длина (L, мм)	3100
Высота (Н, мм)	9.6
Ширина площадки под ленту (мм)	5.5
Для LED ленты шириной (мм)	4 5
Материал	Алюминий
Отделка	Белая (покраска)
Тип отделки	Белый
Категория	PRO
Вариант установки	Врезные
Тип светильника	Профили
Серия	2210
Применение	Встраиваемый
Направление светового потока	Под углом
Тип товара	Профиль
Дополнительные товары (calc)	{ "recommended"; [{ "code"; "MK000036641" }, { "code"; "MK000026432" }, { "code"; "MK000036637" }, { "code"; "MK000041134" }] }
Калькулятор (calc)	1
Длина (calc)	3100
Технический край (мм)	50/50
Объем (м³)	0.0006
В заводской упаковке	30
